WORK EXPERIENCE

Full Stack Developer Intern | GBNodes

(Jan 2026 – June 2026)

- Developed and maintained **5+ scalable full-stack applications** using **MERN stack** (React.js, Node.js, Express.js, MongoDB), delivering responsive and high-performance user interfaces.
- Designed and implemented **10+ RESTful APIs** with secure **JWT authentication**, role-based authorization, and optimized MongoDB/Mongoose operations for efficient data handling.
- Enhanced backend performance by implementing **Redis caching**, query optimization, and refined API workflows, resulting in **significantly reduced response latency**.

Full Stack Developer Intern | DGEN

(May 2025 – Oct 2025)

- Built AI-powered and business-focused web solutions using the MERN stack, delivering optimal client outcomes.
- Implemented secure authentication, role-based access control (RBAC), and seamless third-party API integrations.
- Optimized frontend performance, enhanced backend scalability, and actively participated in core feature planning and agile deployment.

PROJECTS

AllSpark – Online Coding & Evaluation Platform

[GitHub](#)

(Node.js, Kafka, Redis, MongoDB, Docker, JWT, WebSocket, Judge0)

- Developed a **scalable microservices-based online coding platform** supporting real-time coding contests, automated evaluation, and live leaderboards as my **major project**.
- Architected **event-driven backend** using **Kafka** for high-concurrency contest handling and **Redis** for real-time leaderboards and caching, ensuring low latency.
- Integrated **Judge0** for secure multi-language code execution with sandboxing, along with **JWT + OTP authentication** and **RBAC** for different user roles.
- Containerized the complete application using **Docker** and **Docker Compose**, and implemented real-time features via **WebSockets** for live contest updates and submissions.

DigiPandit – Full Stack Spiritual Services Platform

[GitHub](#)

(React.js, React Native, Node.js, Express.js, MongoDB, Socket.IO, Redux Toolkit, Razorpay, Cloudinary, JWT)

- Designed and developed a **production-ready full-stack platform** connecting users with verified Pandits and Astrologers for online consultations, puja bookings, astrology sessions, and e-commerce services.
- Built **role-based dashboards (User, Expert & Admin)** with JWT authentication, booking lifecycle management, profile management, analytics, and secure authorization.
- Implemented **real-time chat, notifications, video consultation support**, Razorpay payment integration, and Cloudinary-based media management to enhance user experience.

Pulse – Private Real-Time Messenger

[GitHub](#)

(React.js, TypeScript, Socket.io, Node.js, MongoDB, Cloudinary)

- Developed a secure real-time messaging platform featuring group chats, media sharing, offline message delivery, and disappearing messages.
- Engineered WebSocket-based communication using Socket.io with account verification and modern chat functionalities.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS .

Backend: Node.js, Express.js, REST APIs, JWT Authentication, WebSockets, Socket.io.

Database: MongoDB, Mongoose, Redis.

DevOps & Tools: Docker, Git, Kafka.

Programming: Data Structures & Algorithms (JAVA).

EDUCATION – B.Tech, Computer Science Engineering (IoT) | SRGI, Jhansi | 2022–2026
